CCGI Vendor Compatability

As part of our commitment to supporting local educational agengies (LEAs), CSIS is proud to help facilitate the implementation of Senate Bill (SB) 153. This legislation requires all public high schools (grades 9-12) to partner with the California College Guidance Initiative (CCGI) to provide 'transcript-informed' accounts for students on CaliforniaColleges.edu. Our role includes verifying that student information systems (SIS) meet the necessary critera, such as aligning with the standards and providing transcript data through an API and/or other automated file sending process. Importantly, EDC § 49083.5(b) states that this list must indicate which SIS vendors must comply with these requirements without passing the costs to LEAs, ensuring a seamless and cost-effective integration process.

SIS Vendor & Product Capabilities for CCGI: EDC § 49083.5(b)

SIS Vendor Information		(1) Grade Levels	(2) Data Elements & Format https://cacollegeguidance.org/tcp/#data-specs				(3) Automated Data Transmission			(4) Cost to LEA	State Designation
Vendor	Product	Serves LEAs educating pupils inclusive of 9-12 grades	Required Data Elements, including 14-digit CDS Code	Anticipated Date of Availability	Additional Data Elements that Impact CSU/UC Eligibility tools*	Anticipated Date of Availability	Automated File Submission (API or automated extract)	Anticipated Date of Availability	Waiver: Alternate method of data extraction/ transmission (Small-sized vendors with approval only)	Fees charged for data elements, data format and/or automated transmission made available	Product is designated as CCGI compatible and compliant with LEA requirements
