1 Introduction

1.1 Purpose of the Annual Report

The *Annual Report* provides the California Department of Education (CDE) a summary of the work performed by the Fiscal Crisis and Management Assistance Team (FCMAT)/California School Information Services (CSIS) to support and maintain the California Longitudinal Pupil Achievement Data System (CALPADS) during fiscal year 2024-25. For readability purposes, “CSIS” will be used throughout this report to refer to FCMAT/CSIS.

CALPADS is governed by the CDE, and as excerpted from section 2 of the *Statement of Work for FCMAT/CSIS 2024-25 Support of CALPADS* (SOW), the CDE’s overarching goals were:

1. Continue to align and bring transparency to how the data local educational agencies (LEAs) submit to CALPADS are used for reporting (e.g., DataQuest) and accountability (e.g. California School Dashboard).
2. Continue to improve CALPADS performance, efficiency, and data quality to: (1) facilitate the submission, review, and use of data by LEAs, (2) facilitate the use of data by the CDE to meet its demands, and (3) enable CDE and FCMAT/CSIS staff to more efficiently maintain and update CALPADS.
3. Continue to reduce LEA reporting burden and at the same time increase data quality and use.

CSIS completes work on CALPADS on behalf of and under the direction of the CDE. The annual report provides the CDE with a description of the CALPADS activities completed by CSIS during the year, visibility into the budgeted and actual expenses, the status of goals, and potential opportunities for the following year.

1.2 Document Conventions

The first approved version of the document will be numbered 1.0. Minor revisions (that is, format, spelling, or clarification) will retain the major version number and increment the revision number to the right of the decimal (for example 1.0, 1.1, 1.2...).

1.3 Approval Authority

The CSIS chief operations officer shall approve this *Annual Report* on behalf of CSIS before submitting it to the CDE. The director of the Educational Data Management Division shall approve this *Annual Report* on behalf of the CDE.

2 *Planned Work for FY 2024-25*

The annual report mirrors the structure of the SOW. Section 2.2 of the SOW identifies planned work in support of the CDE's overarching goals, and section 3 of this report describes accomplishments under the eight major work activities for CSIS under those goals. The SOW also describes overarching development and implementation priorities; an excerpt from the SOW is included in Appendix A for reference. As described in the SOW, the CDE can amend the SOW through the quarterly review process with CSIS. Throughout the year, change requests were added, deleted, or rescheduled through this ongoing review and planning process between the CDE and CSIS. Appendix B itemizes these change requests and their disposition.

Also, as part of the planning process, CDE and CSIS developed an implementation schedule of major activities, milestones, and other important dates to coordinate the work. Consistent with prior practices, the schedule is based on timelines required to meet state and federal reporting requirements and supported by the agile software development methodology. The CALPADS team organizes its work using sprints with a cadence of approximately one week between each software release to production.

The implementation schedule included:

- Software development and testing sprint schedules,
- Data refreshes to support quality testing in the staging environment,
- Projected user acceptance testing (UAT) for new functionality,
- Production releases,
- Proposed "block-out" dates in production when no deployment can be done to ensure the availability of the system for LEAs as a certification deadline nears,
- Initial LEA approval and SELPA approval dates,
- Certification and amendment window deadlines, and
- Service desk holidays.

The CDE and CSIS agreed the implementation schedule would be updated when changes were approved by the CDE. The CDE approved releases during "block-out" dates to ensure software fixes were available for LEAs when they needed them to certify data. The actual release schedule for the year is itemized and included in Appendix C.

3 *Work Completed in FY 2024-25*

This section of the annual report gives an overview of major efforts under each of the goals and major work activities described in section 2.2 of the SOW. Highlights of the major work completed under the SOW include the following:

1. CSIS supported LEAs, student information systems (SIS) vendors and special education data systems (SEDS) vendors along with LEAs with custom student information systems through efforts such as:

 - Offered a PowerPoint template that LEAs can use as a resource to reinforce key privacy and confidentiality concepts as they train local staff on data privacy best practices.
3. CSIS assisted the CDE and LEAs with analysis and documentation of issues, change requests, and business process reengineering, including:
- Collaborated with the CDE CALPADS Office in weekly change request and issue management meetings to discuss system enhancements, data population practices, and a variety of topics such as improvements to data quality with validation, changes to reports support data that on the CA Dashboard, issues, and other prioritized change requests;

- Continued to collaborate with the CDE Special Education Division through weekly meetings to clarify business rules, new requirements, LEA/vendor support, participate in weekly Office Hours and communications;
 - Hosted weekly Q&As to provide LEAs an additional support channel;
 - Moderated the CALPADS two-way listserv;
 - Worked with the CDE on long-term planning priorities, including planning and analyzing future change requests;
 - Continued changes in Fall 1, EOY 3, and EOY 4 requirements and specifications for the students with disabilities (SWD) data, including:
 - applying new certification data discrepancies (CDDs);
 - adding new SELPA monitoring reports; and
 - continued refinement to validations based on data scenarios.
4. CSIS worked on CALPADS maintenance and operations activities, including:
- System releases and support – Delivered approximate 58 releases, including patches, with 692 user stories and 705 bug fixes; provided production support and daily maintenance per the CDE-approved release schedule.
 - 2023-24 comparison: 48 releases with 546 user stories and 661 bug fixes.
 - Environment management- Completed development, testing, configuration and deployment for multiple CALPADS environments (Testing, Staging, and Production)

 - Integrated and tested Migrant Education Program Students (MEPS) changes.
 - Completed MID Merge Proof-of-Concept testing.
 - Assisted with Direct Certification Secondary Match testing and developed core merge logic.
 - Project and team support – Provided interim Scrum Master support for daily CDE Agile/Scrum Meetings.
 - Service Desk and issue management – Maintained and published the CALPADS Known Issue List daily; completed CALPADS Service Desk intake, incident resolution and escalation.
5. CSIS updated automated testing and refined requirements, software development, and testing processes to improve quality outcomes, including:
- New CALPADS logic validation process – Introduced a collaborative design review using a logic traceability matrix, eliminating business-logic defects in all the new Data Discrepancy components and strengthening cross-team communications.
 - New bugs found in CALPADS decreased from 690 in 2023-24 to 653 in 2024-25

- In the same relative timeframe after implementing the matrix, bug counts dropped from 321 to 261 (18.7% reduction).
 - Expanded testing capacity – Partnered with CDE to build from the scratch the CALPADS environment demo environments, enabling faster, parallel testing for key initiatives and reducing dependency on a single test system. It has supported projects including:
 - Fall 1 2025 academic year rollover
 - Migrant Education Program Services (MEPS) Updates
 - Used for Direct Certification and MID Merge testing.
 - Improved data handling efficiency – Implemented an automated Student Data Export/Import pipeline to enhance CALPADS testing capabilities.
 - Securely transfers selected, complete student records from the production environment to testing environments.
 - Allows for developers to reproduce locally to validate bug fixes.
 - Improves the accuracy of testing by allowing for testers design accurate, real-word test records with less time needed.
6. CSIS trained and supported LEAs for Fall 1, Fall 2, EOY 1, EOY 2, EOY 3, EOY 4, cohort processing, student data privacy, statewide student identifier (SSID) maintenance, and anomalies management through the following activities (additional detail can be found in Appendix D):
- Assessed LEA data coordinator knowledge, skills, and ability to resolve all validation errors one month before deadlines and placed LEAs into groups to provide users with tailored training and support;
 - Reassessed LEAs based on a new metric of zero certification fatal errors two weeks prior to the deadline as a revised measure of local capacity;
 - Grouped LEAs based on these new assessments and their anticipated support needs into categories known as waves. In 2022-23, a fourth wave was added to focus support on LEAs that consistently started late. At the end of the fiscal year, the numbers of LEAs in each group were:
 - Wave 4, regular late starters: 73, decrease from 83
 - Wave 1, requiring the highest level of support: 407, an increase from 312
 - Wave 2, requiring some support: 785, an increase from 756
 - Wave 3, requiring lower levels of support: 691, a decrease from 815
 - Continued to expand video offerings on the YouTube channel, including publication of CSIS YouTube Training videos prior to live sessions, and introduction of Shorts videos for announcements;
 - Updated CALPADS training courses based on workflow, SSID, and multiple identifier (MID) process changes stemming from the file submission performance improvement project;
 - Increased content in the CALPADS User Manual, a web-based resource, with direct links to more short video clips;
 - Hosted Q&A meetings once a week for timely information updates and assistance; and

- Monitored LEA progress toward certification for Fall 1, Fall 2, EOY 1, EOY 2, EOY 3, EOY 4 and provided technical assistance.
7. CSIS assisted LEAs in developing and implementing strategies to improve the accuracy and timeliness of CALPADS data, including:
- The Statewide Leadership Training Series with three sessions held in three regions statewide, with guidance on CALPADS reports verification and collaborative strategies for data quality;
 - The Universal Supports Toolkit for LEA use in Differentiated Assistance remediation or data management improvement, including a Data Management Maturity Model and Assessment, and Root Cause Analysis Guidebook.
 - Implemented a CALPADS skills catalog¹ to complement the skill assessment survey and provide data coordinators a roadmap to advance their CALPADS competencies;
 - Monitored LEA progress in resolving validation errors;
 - Increased the visibility of how CALPADS data are used in federal and state reporting, including the consequences of failing to certify data;
 - Provided the CDE with an analysis of errors experienced by LEAs linked to vendor systems; and
 - Implemented analytics in the CRM to automate LEA submission progress.
8. CSIS provided effective management, office support, and technology services to CSIS staff, including:
- Directed and supported CSIS operations, including human resources, fiscal, legal/contracts and business services functions;
 - Expanded use of Microsoft TEAMS for regular collaboration and Zoom for improved staff engagement during larger meetings and requiring staff to use video whenever that option is available for online meetings;
 - Managed and maintained CSIS infrastructure, including CSIS-hosted CALPADS automated testing environments, and provided internal service desk services to support CSIS staff working on CALPADS activities; and
 - Provided fiscal and program reports to educational partners.

¹ The catalog organizes skills in the areas of time management, data leadership, curating and using quality data, critical thinking and being a coalition builder. Proficiency in these areas is critical to successful state reporting.

4 *Work Accomplished by Quarter*

The CSIS organization provides CALPADS maintenance and operations services through three departments: Requirements Management, Information Systems, and Client Services. Business analysts in the Requirements Management Department assist the CDE in managing issues and change requests, conducting data analysis, eliciting, and analyzing requirements and business rules, and generating user stories that document discreet units of software development and testing work activities. Software developers and testers in the Information Systems Department coded and unit-tested enhancements according to user stories and completed bug fixes escalated from the service desk by testing analysts and specialists. CSIS testers were responsible for system testing software code developed by both CSIS and CDE developers. Network systems staff in the Information Systems Department managed and maintained the CSIS infrastructure. The Client Services department provided technical support to local educational agencies (LEAs). Additionally, field support technicians and specialists trained users, while data analysts conducted analysis on suggested changes and provided direct support to LEAs.

The 2024–2025 Statement of Work (SOW) Attachment A described the CSIS software development processes at a high level, from requirements and change management to implementation. These processes followed agile-scrum methods of planning, managing, and completing work activities with the goal of developing and fully testing increments of functionality that could be released to production weekly. These high-level processes were further elaborated in CSIS standard operating procedures (SOPs) for end-to-end application lifecycle management. Adherence to SOPs increased the team’s efficiency and effectiveness in understanding the impacts of change requests to the existing system. SOPs were used to identify scope, establish schedules, and plan capacity through collaboration with all partners. SOPs for development and testing ensured comprehensive traceability and the consistent application of best practices across processes.

CSIS leveraged the Information Technology Infrastructure Library (ITIL) best practices to govern its approach to CALPADS operations, training, and support. The organization also examined its agile life-cycle practices for continuous service improvement quarterly and annually, using key performance indicators (KPIs) for each SOP.

As part of the CALPADS team, CSIS business analysts, developers, testers, data analysts, trainers, and service desk agents assisted the California Department of Education in the maintenance, operations, and support of CALPADS. This section of the annual report provided a narrative of the work completed during the 2024–2025 program year.

4.1 *First Quarter, July – September*

In the first quarter, the CALPADS team supported LEAs in certifying their data on time for the End-of-Year (EOY) submission. The 2023–24 EOY submission closed successfully on August 16, 2024, with 100% of LEAs certifying. A higher number of LEAs met the initial July 26, 2024, deadline compared to prior years, positioning them to focus on improving data quality during the amendment window. This demonstrated significant progress in LEA readiness and efficiency.

Given legislative changes requiring shorter deadlines to allow for earlier public access to California School Dashboard data, continued communication and targeted support for LEAs remained essential.

ANNUAL SYSTEM UPDATES AND FALL 1 SUBMISSION

Prior to the Fall 1 submission, the CALPADS team conducted annual system rollover activities on September 17, 2024. This included modifying, adding, or retiring codes and valid code combinations, as well as updating validations to improve data quality. In 2024–25, the team prioritized monitoring and remediating system performance issues while implementing a smaller number of functional changes compared to the previous year’s large-scale redesign of students with disabilities reporting.

Key enhancements included:

- Making all Operational Data Store (ODS) extracts available throughout the day, without requiring nightly processing.
- Expanding certification data discrepancies (CDDs) to allow LEAs continuous visibility into data quality for Fall 1 and Fall 2.
- Developing new monitoring and certification reports, particularly for students with disabilities, informed by prior data scenarios.

LEA SUPPORT

The CALPADS team continued to apply rolling progress assessments established in 2023–24 to identify LEAs at risk of late certification. This milestone-based monitoring ensured that LEAs had sufficient time to review and certify submissions accurately.

TRAINING AND STATEWIDE LEADERSHIP INITIATIVES

In mid-August 2024, Fall 1 training opportunities were announced to LEAs. Sessions were offered based on demand, with additional offerings added as needed.

Additionally, in partnership with the California County Superintendents (CCS) Curricular & Improvement Support (CISC) Committee, the California Department of Education (CDE), and the Fresno County Office of Education (FCOE), CSIS piloted a new statewide leadership training program. This initiative targeted district and charter administrators, focusing on the connections between CALPADS submissions (Fall 1, Fall 2, and EOY) and their impact on the School Dashboard. Twenty county offices of education signed up to offer this training series during the pilot year.

REGIONAL ENGAGEMENT

The CDE and CSIS continued to conduct County Office Education (COE) User Group meetings to gather feedback from COEs on proposed updates and new CALPADS features. These meetings provided an important forum for the field to share perspectives and influence system improvements.

In addition, CDE and CSIS hosted regional meetings to communicate system changes and provide statewide guidance. The first regional meetings were held on September 24–25, 2024, and focused on Fall 1 and Fall 2 submission activities.

4.2 Second Quarter, October – December

During the second quarter, the CALPADS team focused on bug fixes and performance enhancements to improve the user experience.

FALL 1 SUBMISSION

The initial deadline for the 2024-25 Fall 1 submission was December 13, 2024. The deadline was met by 99.9% of LEAs, with only one LEA holding unapproved data after the deadline. By contrast, four LEAs had unapproved data after the same deadline in 2023–24, reflecting a 75% statewide performance improvement. Improved compliance allowed LEAs to dedicate more time to data quality during the amendment window.

FALL 2 PREPARATIONS

The Fall 2 submission opened on December 17, 2024, and was scheduled to close February 28, 2025. In preparation, the CALPADS team:

- Converted 12 Fall 1-specific certification validations into data discrepancy (DD) or CDD validations and created 11 new validations specific to Fall 2.
- Improved assignment monitoring by recategorizing content areas and enhancing validations and staff-level reports.
- Released a new SELPA ODS Reporting extract (16.24) to improve visibility of students with disabilities included in state and federal reporting.

LEA SUPPORT

The team expanded the use of CALPADS milestones to assess LEA performance. LEAs were expected to resolve all fatal errors by February 7, 2025. Those missing this benchmark were designated at-risk and received additional support. The “Error-Free by Date” metric carried increased weight in 2024–25, automatically flagging LEAs with unresolved fatal errors for intervention.

FALL 2 TRAINING

The pilot leadership training continued with the Fall 2 session. Twenty county offices of education participated, with over 500 attendees statewide. Survey results indicated a 99% satisfaction rate. Planning began for the final EOY session and for evaluating long-term implementation of the program.

4.3 Third Quarter, January – March

FALL 2 SUBMISSION STATUS

The Fall 2 submission, which opened December 18, 2024, was extended to March 21, 2025, in response to Southern California wildfires. The extension provided an additional three weeks without affecting CDE’s state or federal reporting timelines. Improved system performance supported LEAs in remaining on track for timely certification.

END OF YEAR (EOY) PREPARATION

The CALPADS team prepared the software for the End of Year (EOY) submission with a limited number of functional changes, while continuing to address system performance. This included:

- Building on the work of converting approximately 23 Fall 1 and 2 specific certification validations to data discrepancy (DD) and certification data discrepancy (CDD) validations, converting 28 EOY related certification validation rules and creating 41 new DD/CDD validations specific to EOY 1-4 submissions. By converting these validations to process before the submission window opens, LEAs have the opportunity to identify and correct erroneous data, improving data quality prior to certifying their EOY submissions.
- Supporting the new CA School Dashboard measure for long-term English learners (LTEs) by including LTEs in cohort reports, while delaying certification-level reporting until Phase 2 in 2025–26.
- Refining EOY reports and validations to strengthen measures used in Dashboard accountability.

LEAS SUPPORT AND UNIVERSAL SUPPORTS TOOLKIT

The CALPADS team continued to prioritize LEA support as a critical initiative, given the introduction of CALPADS Differentiated Assistance (DA) eligibility and the progressively earlier public release of the CA School Dashboard through 2026, as required by SB114.

To support LEAs in DA and promote stronger data-driven practices statewide, CSIS launched the Universal Supports Toolkit to help LEAs improve their data management programs and initiatives. The flagship component, Data Management Maturity Model and Assessment, enabled LEAs to establish baselines, identify strengths, and set improvement targets for data governance.

END OF YEAR (EOY) LIVE TRAINING

At least two sessions were offered for each course, with a third session added when demand was warranted. Each training course was recorded, and on-demand recordings became available on the CSIS YouTube Training Channel in late May.

STATEWIDE LEADERSHIP TRAINING SERIES

Building on the success of the Fall 1 and Fall 2 CALPADS leadership trainings, the series concluded with the End of Year (EOY) session, focused on EOY submissions. The session followed the same leadership-focused model, helping education leaders oversee and support CALPADS reporting.

The training highlighted how CALPADS data feeds into the CA School Dashboard and why this connection is essential for informed decision-making. Three sessions were held in April 2025 at COEs across the state, with additional COEs participating as watch sites.

The EOY session marked the conclusion of the pilot program, with findings informing improvements for a permanent statewide leadership training program.

4.4 Fourth Quarter, April – June

END OF YEAR (EOY) 1-4 SUBMISSION STATUS

The EOY 1–4 submission window opened May 6, 2025. LEAs were encouraged to resolve all fatal errors by July 11, 2025, in advance of the July 25, 2025 certification deadline and the August 8, 2025 amendment deadline.

[Flash 299](#) marked a shift to year-round DD/CDD monitoring of EOY validations, allowing LEAs to address discrepancies continuously rather than waiting for submission windows. [Flash 300](#) emphasized completing English Learner reviews and reclassification decisions by June 30, 2025.

SYSTEM UPDATES AND FUTURE ENHANCEMENTS

The CALPADS team prepared the EOY submission and 2025–26 system enhancements, including:

- Expanded the long-term English learner (LTEL) subgroup to be included in the cohort reports for 2024–25 and planned to be rolled out to certification reports in 2025–26
- Enhanced the direct certification process by adding a secondary match using updated technology. This enhancement incorporates CalFresh and CalWORKs data from the California Department of Social Services, supplementing the existing match performed by the Department of Health Care Services. Additionally, directly certified students are automatically included in LEA extracts.
- Direct integration of migrant student data through CALPADS, eliminating the need for LEAs to submit this data through regional offices.
- Requirements for Expanded Learning Programs (ELP) and attendance recovery (AR) initiatives were vetted in 2024–25. Beginning in 2025–26, CALPADS will collect data on these programs, enabling LEAs to report ELP participation for funding accountability and to recover absences for average daily attendance (ADA) funding through AR activities.

LEA SUPPORT

Support continued through targeted training, the Universal Supports Toolkit, and new initiatives for small districts, such as a root cause analysis framework and a data catalog tool. On-demand training recordings remained available via the CSIS YouTube Training Channel.

LEADERSHIP TRAINING SERIES CONCLUSION

The final EOY leadership training session was scheduled for April 2025, hosted by county offices of education statewide. This session concluded the pilot program, with planning underway for its permanent adoption in 2025–26.

INFRASTRUCTURE OPERATIONS AND MAINTENANCE

CSIS maintained the hardware and software necessary to fulfill its obligations under the annual scope of work. During the year, the infrastructure team implemented a new service desk system that offered self-help options, improved notifications on request updates, and faster response times through streamlined workflows. In 2024–25, the team completed 700 service desk tickets for CALPADS, ensuring timely support for staff and system operations.

CSIS continued to enhance infrastructure security capabilities by patching systems to the latest versions and conducting ongoing email phishing simulations to assess risk and determine training needs. The infrastructure operations and maintenance team also reviewed monthly independent IT security assessments to identify and resolve network vulnerabilities and configuration issues. Annually, all CSIS staff attended the CDE's privacy training course.

Through these measures, CSIS upheld a robust, secure, and efficient technology framework that supported the successful maintenance and operation of CALPADS.

5 *Budgeted and Actual Expenses for FY 2024-25*

Revenues

Salaries and salary-driven benefits costs continue to be the largest expense. FCMAT/CSIS staff receive Cost-of-living adjustments (COLA) each year as part of Kern County Superintendent of Schools (KCSOS). Neither FCMAT nor CSIS are consulted in classified union negotiations, but CSIS is bound to the outcomes of those negotiations. Other revenue from fees and contracts increased budget from prior years with the addition of the CDE data reporting analyst.

FCMAT/CSIS continued savings in 2024-25 wherever possible by reducing staffing and expenses and allowing for extended vacancies. FCMAT/CSIS had three FTE vacancies for much of the fiscal year.

Expenditures

Salaries and Benefits:

Continuing with the staffing plan set in 2023-24 CSIS hired one additional testing analyst position. This position was filled by a candidate who was previously on contract. KCSOS negotiated a .25% Off-schedule increase in salary for 2024-25.

Rents, Leases and Repairs: The estimated total for rents, leases, and repairs reflects a decrease in costs compared to the prior year. Rent concessions as a result of the relocation of the CSIS office space resulted in savings when compared to prior years. Rent concessions will be carried into 2025-26, and the new lease schedule will begin mid 2025-26 with net savings over the prior office space.

Supplies and Noncapitalized Equipment: The supplies and noncapitalized equipment expenses were consistent with the expectation to continue to support telework. Actual expenses increased slightly from the beginning budget due to costs associated with the move of the CSIS office space.

Travel and Conference: Travel costs increased due to the statewide leadership training series.

Professional/Consultant Services: The professional/consultant services costs decreased slightly from prior year due to the move of one FTE to a CSIS testing analyst position.

Direct Costs: When CSIS staff have the capacity to assist on non-CALPADS projects, those direct costs are captured from other projects and returned to CALPADS. These costs vary year to year.

6 *Status of Goals*

6.1 Status of 2024-25 Goals and Improvements to Consider for 2025-26

Over the past year, the CALPADS team successfully achieved the goals outlined in the 2024-25 *Statement of Work* (SOW).

Building on these accomplishments, and in the spirit of continuous improvement and collaboration, the priority for the coming year will be to finalize mutually agreed-upon work processes that align with best practices and meet the practical needs of the CALPADS team. These processes will help ensure the delivery of consistent, high-quality software and data to educational partners. Achieving this objective through completion of the next fiscal year's SOW, along with any supporting documents that further define CDE and CSIS workflows, will be essential to our shared success in maintaining and operating CALPADS for the benefit of the broader TK–12 data ecosystem.

6.2 Goals for the 2024-25 Statement of Work

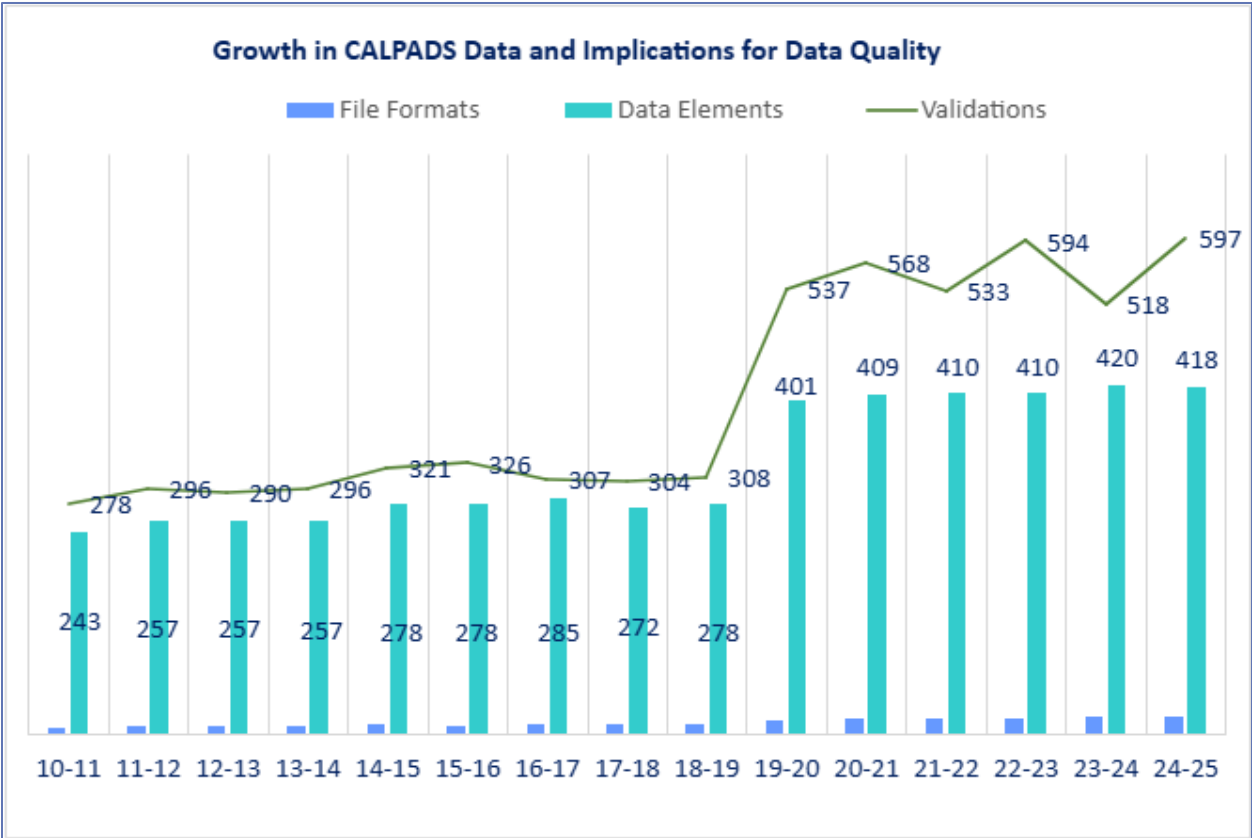

The CDE and CSIS are longstanding partners with mutual interest in advancing timely and accurate data for informed decision-making among educational partners. CSIS looks forward to continued collaboration with the CDE to meet its vision and goals for the CALPADS application. The CDE recommended that the goals from 2024-25 should continue to apply in the next fiscal year, and the CDE overarching goals and CSIS major work activities in support of goals have been incorporated into section 2 of the *Statement of Work for FCMAT/CSIS FY 2024-25 Support of CALPADS*. The CDE has approved the statement of work, and together with CSIS will begin working on first quarter revision to reflect updates to the addition and disposition of change requests as well as ongoing capture and refinement of mutually agreed-upon work processes.

7 Summary

In 2024-25, CSIS worked closely with the CDE to meet major work activities and build support among educational organizations for increased data quality and use. Engagements included virtual presentations as well as direct support to LEAs, student information system and special education data system vendors. In 2024-25, the CALPADS team improved engagement with end users, providing visibility into the status of the system, known issues and bug fixes weekly, and provided end users with opportunities to participate in some user acceptance testing activities that gave LEAs and vendors an opportunity to work with system changes ahead of production implementation. Their participation in testing and feedback continues to be critical to making CALPADS successful.

The year continued a trend of ongoing changes for CALPADS with the intent of improving data quality and user experience that affected each submission period and will help to build a stronger data ecosystem for the state of California. The major accomplishments for 2024–25 included targeted enhancements and bug fixes to CALPADS. Compared to the significant changes implemented over the prior three years, these updates were more limited, reflecting a deliberate emphasis on maintaining system stability. Data quality remained a key focus for the CALPADS team, with efforts building on the work initiated in 2022–23 and improved further in 2023–24 through the file submission performance improvement project. In 2024–25, this work was advanced by transitioning validations from the project to run continuously throughout the year, giving LEAs earlier visibility into erroneous data rather than waiting until submission windows opened. These efforts continued to strengthen local capacity for data management across educational partners.

In 2024–25, CALPADS focused on system stability and performance improvements rather than introducing new file formats or data elements. As shown in the chart below, the number of file formats and data elements remained stable between 2023–24 and 2024–25. This stability created the opportunity to concentrate on enhancing processing speed, refining underlying logic, and strengthening validations. By advancing work from prior years, CALPADS provided LEAs with earlier visibility into data quality issues, while ensuring the system could efficiently support ongoing statewide data needs.

As part of the CALPADS team, CSIS completed work focused on maintaining system stability, improving processing performance, and enhancing data quality in 2024-25. Appendix G provides a detailed accounting of individual work items completed. CSIS will continue to support the CDE in operating, maintaining, and enhancing CALPADS efficiently and effectively, in alignment with CDE’s strategic direction. The team remains committed to delivering high-quality work within a collaborative environment of continual improvement.

Appendix A – 2024-25 Development Priorities

As an aid to the reader, the following has been excerpted from Section 3.2 of the FY 2024-25 SOW:

FCMAT/CSIS will conduct activities related to maintaining and updating the software in the production environment, including defect fixes, developing, testing, and implementing changes. Development and implementation of changes to CALPADS includes the following primary activities:

- Identifying and analyzing issues or proposed new functionality, developing change requests to address issues or create new functionality, and developing requirements for programmers to follow.
- Replicating and analyzing potential defects and identifying solutions.
- Developing, testing, configuring, and deploying defect fixes and changes for promotion to the production environment.
- Conducting User Acceptance Testing (UAT) for major changes.

Specifically, FCMAT/CSIS development and implementation priorities will include:

- Fixing all Severity 1 and 2 defects, and high priority Severity 3 defects as identified by the CDE and FCMAT/CSIS. (Goal 2)
- Implementing CALPADS high priority system enhancements to meet business requirements and technical changes (Goal 2) as specified in approved Change Requests (CRs) by:
 - Creating new or modifying existing database tables
 - Implementing code sets and valid code combinations
 - Developing input validation rules (IVRs), data discrepancy (DD) rules, and certification data discrepancy (CDD) rules
 - Modifying user interfaces to present new or modified features and functionality
 - Creating new or modifying existing reports
 - Modifying existing IVRs, DDs, and CDDs as needed
 - Modifying existing reports as needed
- Depending on resources, implement additional other smaller change requests as determined by the CDE. (Goals 1, 2)

Enhancement priorities are established through CRs, which require approval from the CDE. The list of potential change requests, as of June 2024, are included in Appendix D – *2024-25 CALPADS Change Requests*, by release month. This list will be reviewed (new CRs added, and others removed) and prioritized continuously by the CDE and mutually agreed upon changes will be reflected in the quarterly updates to the SOW. Approved units of work will be organized by FCMAT/CSIS in the backlog for implementation.

In some years, a major new data collection must be implemented to meet a new state or federal requirement, or a major change to an existing set of data must be made to address issues related to way the data are collected. These changes require dedicated project management, and often include significant input from vendors and users, user acceptance testing, a readiness assessment, targeted communications, and training. For 2024-25, the following major projects will be implemented:

- CR 2648: Upgrade CALPADS to .NET 8 (Goal 2)
- CR 2543: MID Merge UI Enhancements (Goals 1, 2)

In addition to the enhancement priorities identified above to meet business or legislative requirements, the CDE has identified critical technical changes and deems them to be a high priority to improve system performance or user experience. The CDE will develop the proof of concept specifically for these identified solutions and then will work in collaboration with FCMAT/CSIS on a development and implementation plan with consideration for the availability of CDE and FCMAT/CSIS resources to complete the work. CRs in this category include:

- CR 2265: MID Detection/Online Search/SSID Match Tool – Enhance Matching Logic to Include Probabilistic Matching using Elasticsearch (Goals 2, 3).
- CR 2206: Conduct Additional Direct Certification Match for SNAP and TANF (Goals 1, 2).
- CR 1852: Course and Staff Data Redesign – Redesign of the course data collection for Cradle-to-Career readiness. CR 1852 is a continuation of work started in 2023-24 to vet requirements with the CALPADS Operations Office (CO) and FCMAT/CSIS; implementation remains TBD (Goal 2).
- CR 1757: Modify the CALPADS reporting structure to include the CALPADS ODS reports. This will greatly reduce the amount of time LEAs must wait for refreshed ODS Reports. Deprecate the overnight process that produced extracts and migrate extracts and reports to CALPADS Reporting (Goals 1, 2).

Changes will be scheduled for releases through the release management process and integrated into the workplan while maximizing available resources. Through the release management process, CDE and FCMAT/CSIS will work together to revisit the SOW to ensure the SOW is updated quarterly to accurately reflect the agreements of the work priorities above.

Additionally, the TSD's ADMO, and School and Student Data Office (SSDO) may develop, test, and request changes be streamed into the CALPADS release schedule. This will require TSD to work with the COO to confirm priorities and approve release plans and with FCMAT/CSIS for any testing and implementation support. Work in this category includes:

- CR (unknown): Enhancements to metrics and reports for the CALPADS administrative tool/dashboard

Additional testing by LEAs prior to software releases is desirable as it helps to identify potential bugs sooner through actual LEA data examples and the opportunity to take corrective action sooner. This approach is necessarily reliant on LEAs to participate. The CDE and FCMAT/CSIS will jointly support recruitment of LEAs for the purpose of increasing their engagement in the user acceptance testing effort. To facilitate preparedness for software releases, FCMAT/CSIS will share information about software readiness for Fall 1, Fall 2, and EOY 1-4 that will include testing status, a readiness assessment, and a recommendation for go/no-go. This is expected to be a collaborative approach so that the CDE and FCMAT/CSIS can assess risks and discuss mitigation and/or contingency plans before software is released to production.

FCMAT/CSIS will conduct activities related to maintaining and updating the software in the production environment, including defect fixes, developing, testing, and implementing changes. Development and implementation of changes to CALPADS includes the following primary activities: Identifying and analyzing issues or proposed new functionality, developing change requests to address issues or create new functionality, and developing requirements for programmers to follow.

Appendix B – Change Requests for 2024-25
